

With new technologies and energy savings as a prime focus of our customer's business, we have expanded our services to include audio visual and security solutions. Todd Ripley has joined our team bringing with him an EET Electronic Engineer education plus over 20 years experience in this field. He is certified for Crestron DM 4K Engineering & Programming and has been trained in all facets of access control, cameras, sound systems, etc.

Application Solutions for:

- Conference Rooms
- Hospitals
- Education

Facility Monitoring and Controls In serving our customers with the best quality products, we are now offering Crestron. As an authorized dealer for Crestron, we can monitor, manage and control all the technology through the entire facility both centrally and globally.

Digital Signage and Interactive Smartboards

Digital signage provides flexibility and creativity to delivering a message to customers and employees. One of the biggest benefits of digital signage is being able to update it on a moment's notice and adapting to changes without cost and delay waiting on print. Digital signage also allows the ability to integrate videos and real-time news or weather at any given time. Some of the brands we carry are: Sharp, Samsung, NEC, LG.

Interactive smartboards have grown in popularity over the past few years. These whiteboards are effective tools for improving learning, communication and collaboration. They encourage participants to collaborate in a shared work environment.

Votaw Electric can provide a variety of displays, digital signage, projectors, tablets, security, surveillance and controls for your business.

Access Controls and Camera Systems

Votaw Electric is also an authorized dealer for Gallagher, one of the leading security systems and access controls products. Let us help you enforce business safety and security processes "at the door" of your business. Gallagher supports integration with a range of third party security products, using Gallagher developed interface software and industry standard protocols. All Gallagher system integrations are individually licenced, optional features and are supported on specific version for third party software. We also provide Exacq video management solutions and Axis camera systems.
