How do you control and monitor personnel and visitor access on your site?
Do you want to use one platform to provide automatic access control across multiple sites?

GALLAGHER

## Gallagher's Access Control Solutions:

- Automatic access decision and tracking of who can go where and when on site
- Automatic execution and enforcement of business policy
- World class situation awareness in Command and Control
- Scalable access control systems for growing organizations
- Use of existing IT infrastructure to host the security system
- Immediate notification of alarms raised, optional text/email alerts
- Single platform for managing access control across multiple sites

## Flexible, scalable system to suit your needs

- Options to customize, to create the perfect security solution for any organization
- Cater from zero doors to multi-site, global systems
- Monitoring and control of people on site using electronic card readers, biometric fingerprint readers, and keypads
- The Gallagher system resides on an organization's existing network utilizing normal IT communications
- Gallagher Software Maintenance keeps users up to date with upgrades and regular software releases
- Integrations with third party systems including elevators, HR/people management systems, DVR systems

## Business compliance with every access decision

- Automatic enforcement of business policy through integration of compliance information with access control decisions
- Inductions, licenses, qualifications and training of personnel can be monitored within the access system
- Real-time audit trail enables access decisions and requirements to be quickly adjusted and implemented
- High degree of control and certainty of personnel locations on site minimizes the risk of accidents, site shutdowns, and corporate liability

## Worldwide, Gallagher delivers business integrated security management:

- Personnel workflow
- Security and risk management
- Business continuity

---

- *Single scalable platform*

Gallagher Command Centre allows central configuration and management of:

- Access control
